RE: Southern Nevada Health District- Adult Immunizations

The Fund wants to clarify that Southern Nevada Health District (SNHD) is a contracted provider for both pediatric and adult participants who require immunizations.

Prior to January 1, 2014, the Fund only covered pediatric immunizations. With the new ACA regulations, adult immunizations are now a covered benefit when participants use a PPO provider.

Please note- The Culinary PPO Directory has been printed and distributed; however only references the SNHD under the pediatric sections. New directories cannot be printed at this time; therefore please inform and distribute this notice to all staff who communicates with participants that adult immunizations are included at SNHD.

If you have any questions, please contact me directly at (702) 892-7309.

Sincerely,

Kimberly Esau
Manager of Healthcare Services-Culinary Health Fund
